3. Summary..... 7

1. Introduction

The purpose of the document is to describe the activities performed in the testing of the Allegro Sandbox application and to provide an overall assessment of the quality of the software under test.

2. Range and results of tests

2.1. Testing process

Testing of the application took place according to the schedule included in the test plan. Manual tests included:

- smoke tests - checking the basic functionality at the very beginning
- exploratory session - to become familiar with the application and assess which areas require further testing (preparation of test cases)
- regression - checking if the defects found and their corrections have not caused new defects
- functional tests - based on the specifications
- cross-browser - checking the correct operation of the application on different browsers

2.2. Range and status of the tests

List of functionalities that have been tested along with the status of the tests:

Module name	Description	Status	Comment
Registration	Registration of a basic user and business account with an e-mail address	**NEGATIVE**	Creating a business account is impossible
Logging in	Logging in with an e-mail account	**POSITIVE**	No objections
Language change	Checking the quality and accuracy of the translations	**NEGATIVE**	Missing translations and site elements
Account's settings	Problem displaying avatar	**NEGATIVE**	Avatar does not display automatically

Module name	Description	Status	Comment
Others	Content accuracy of site elements	NEGATIVE	Inaccurate map

2.2.1. Non-tested areas

Functions that have not been tested.

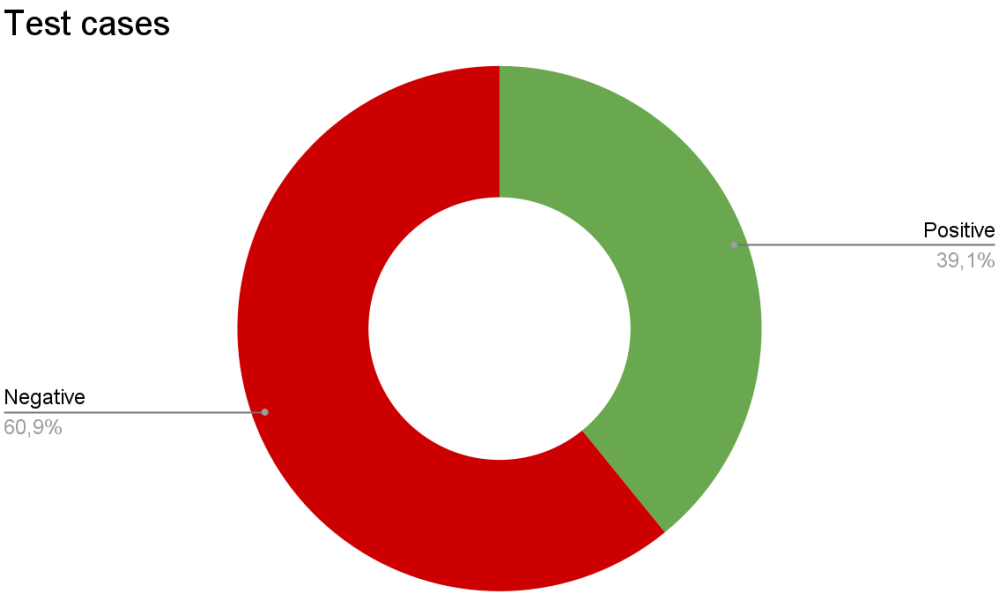

Module name
Discount vouchers and coupons
Payments

2.3. Metrics

Defects were detected during the tests, the data is presented in tables and graphs.

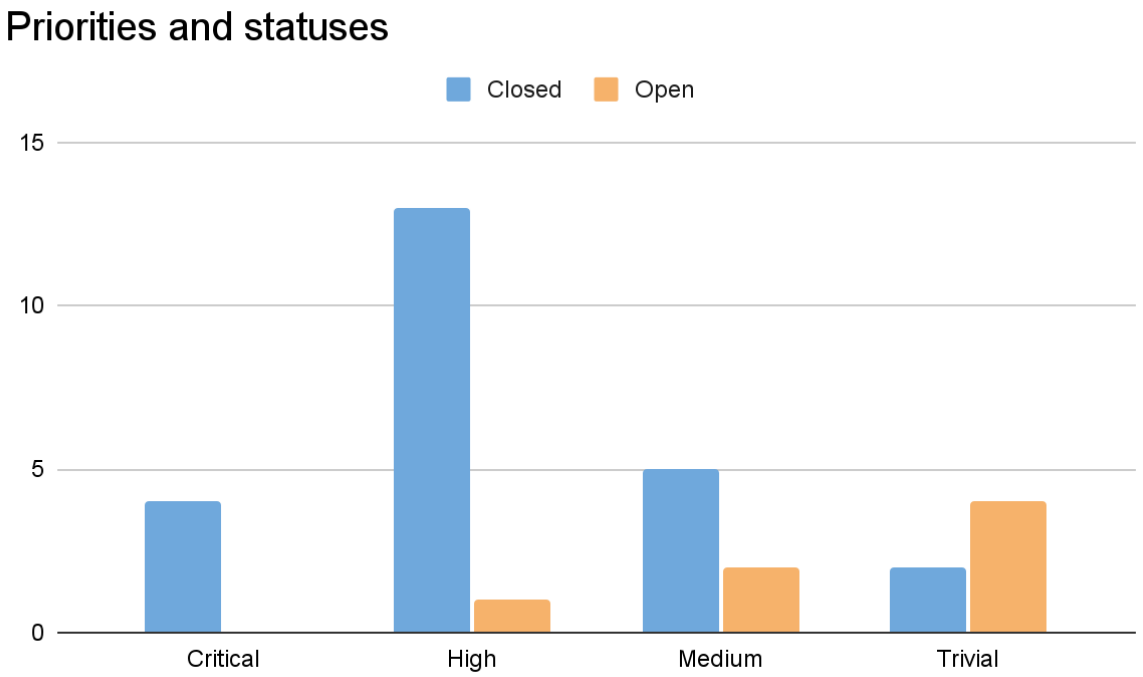

2.3.1. Number of test cases, scheduled executions and their status

Planned tests	Performed tests	Positive	Negative
46	46	18	28

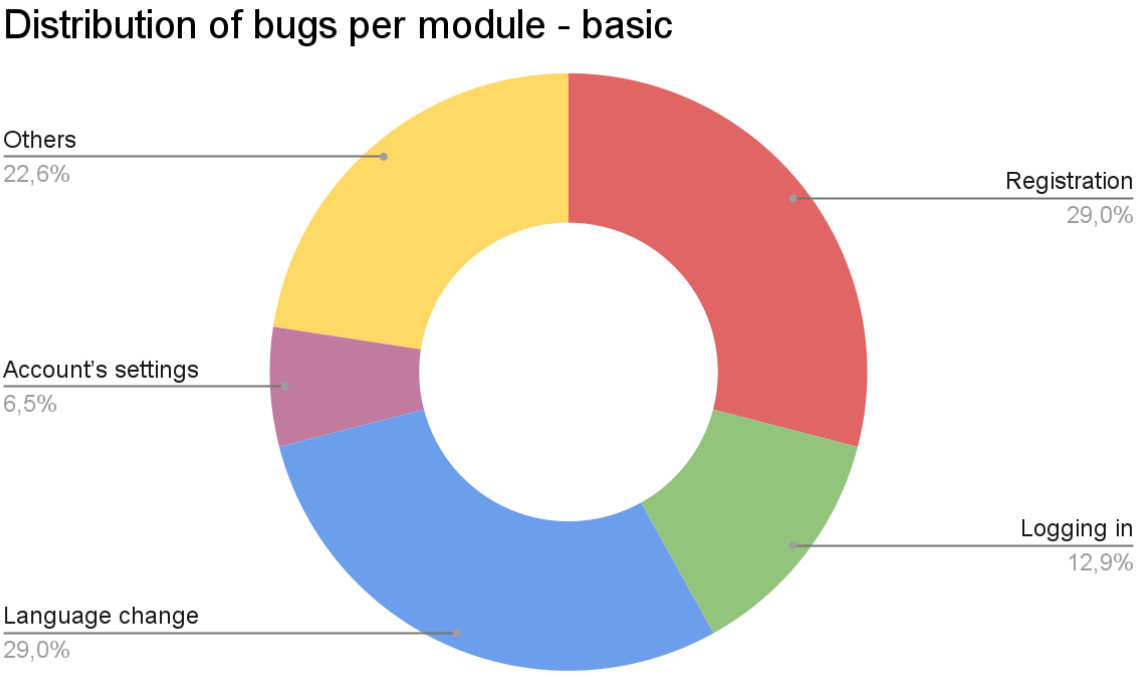

2.3.2. Defects found - priorities and statuses

	Critical	High	Medium	Trivial	Sum
Closed	4	13	5	2	24
Open	0	1	2	4	7
					31

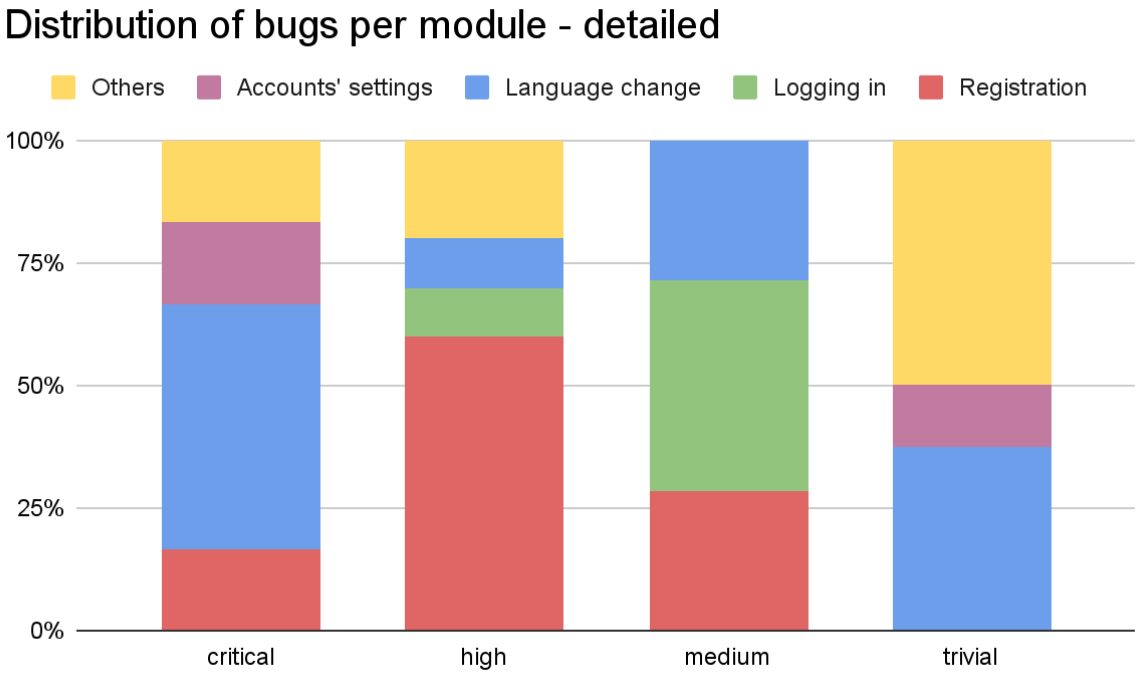

2.3.3. Distribution of bugs per module - basic

Registration	Logging in	Language change	Account's settings	Others	Total
9	4	9	2	7	31

2.3.4. Distribution of bugs per module - detailed

	Registration	Logging in	Language change	Account's settings	Others	Total
critical	1	0	3	1	1	6
high	6	1	1	0	2	10
medium	2	3	2	0	0	7
trivial	0	0	3	1	4	8
sum	9	4	9	2	7	**31**

2.4. Environment

Environment	Test
System	MacOS Monterey version 12.6.7
Device	Macbook Air (13-inch, Early 2015)
Browser	Chrome version 114.0.5735.133 Safari version 15.6.1 Firefox 115.0.2

3. Summary

App status: NEGATIVE

Performed tests did not define the application status as good.

No blocking defects were detected during the tests, yet the critical and important defects detected are still to be fixed. Therefore, the quality of the application cannot be described as good. Due to the existing bugs, it is recommended to fix them. The application has defects that do not allow the application to be released to the

production environment. The defects found should be fixed and then tested. This should be followed by regression testing again to ensure that the corrections made have not introduced other defects.
